WORK EXPERIENCE

Data Scientist

Caterpillar Inc.

July 2017- Present Peoria, IL

- Graduate of the Analytics Professional Development Program
- Build machine learning pipelines using various frameworks in Python for random forest regressions models, reinforcement learning models, and various deep learning models for computer vision applications
- Co-developed Python library for interfacing with Caterpillar machines which allows for programmatic commands to be given to command machine movement which includes automatic data gathering, real-time visualization, and analysis
- Build data storage prototype utilizing MySQL and Flask to centralize telematics and kinematics data storage and data access across many projects
- Utilize Docker for portability of machine learning pipelines as well as data preprocessing pipelines

Head of Staff

Summit Ministries

Summers of 2015-2017 Manitou Springs, CO

- Oversaw staff of 35-45 camp counselors and 180 students for 2-week conferences during the summers
- Coached counselors in discussion facilitation, job duties, and techniques for handling sensitive issues such as student misconduct
- Led efforts to find solutions for situations with disgruntled students and/or parents
- Gained valuable leadership skills in the areas of personal connection, adaptation, critical thinking, and situation analysis
